

docker day
2017 Dec
Isfahan University of Technology

#### Alireza Omidi

Software Engineering BSc

Senior Studen

Isfahan University of Technology

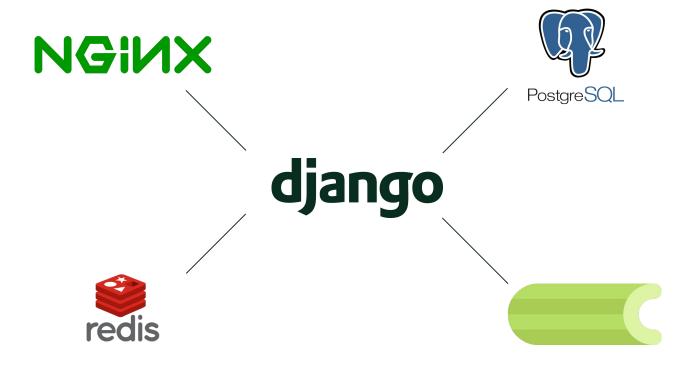

#### aomidi@acm.org

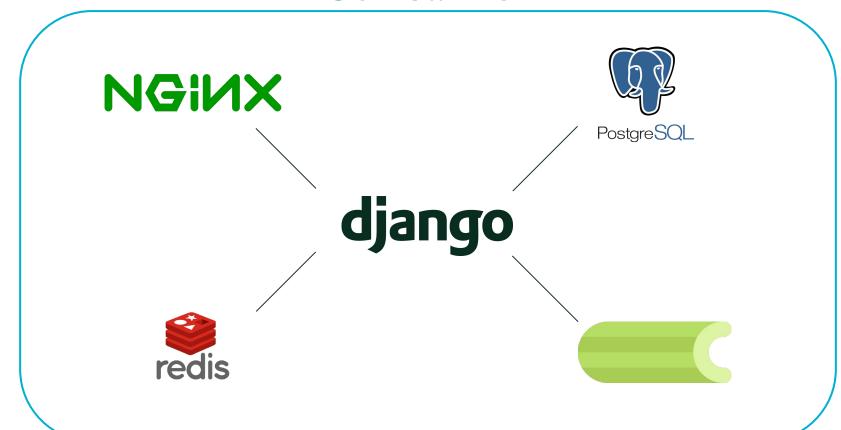

# **Shipping Problem**

### **Softwares are Complex**

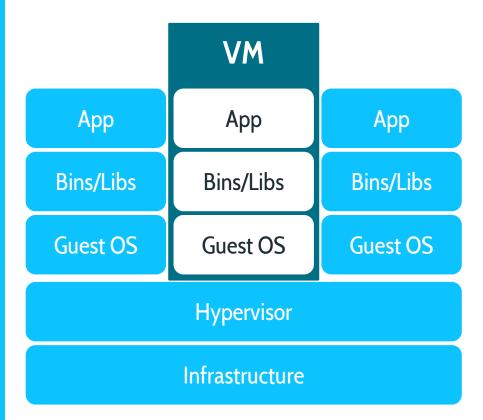

#### Container

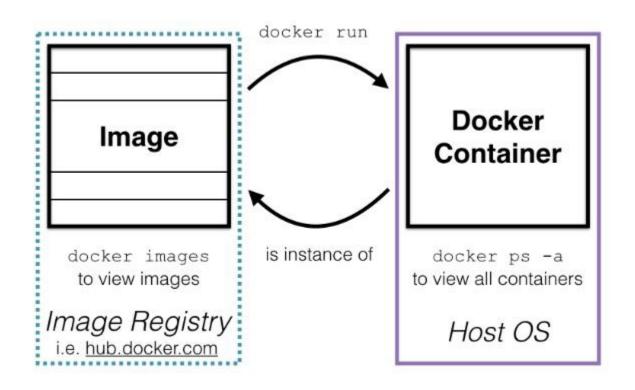

## **Docker Begins!**

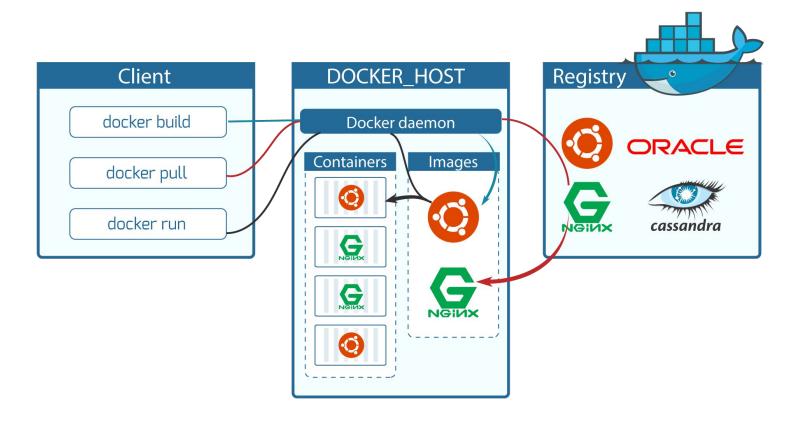

**Container** App App App Bins/Libs Bins/Libs Bins/Libs Docker Host OS Infrastructure

# **Image vs. Container**

### **Image vs. Container**

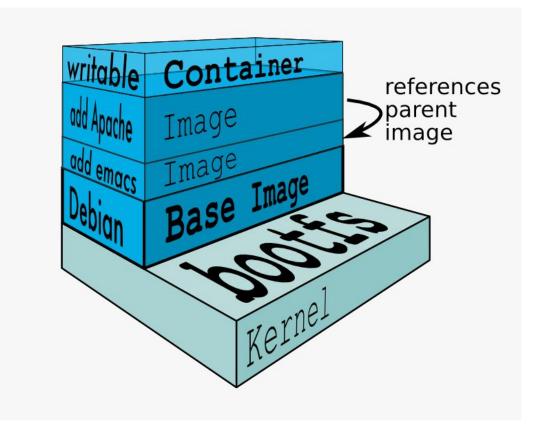

#### Demo

**Docker Basic Commands** 

- hub.docker.com
- docker pull
- docker run
- docker images
- docker ps
- docker exec

# **Docker Layers**

#### **How to Create a Docker Image?**

docker built

Docker Image

#### **Dockerfile: An Example**

```
FROM ubuntu

MAINTAINER Alireza Omidi

RUN apt-get update && apt install -y nginx

COPY index.html /usr/share/nginx/html/

CMD /usr/sbin/nginx -g "daemon off;"

EXPOSE 80
```

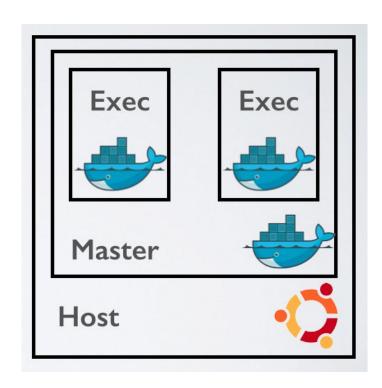

#### Demo

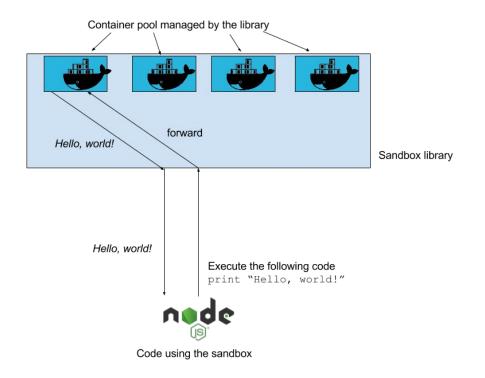

Dockerfile

- FROM
- CMD, ENTRYPOINT
- RUN
- ADD, COPY
- WORKDIR
- MAINTAINER
- LABEL

# **Docker Use cases**

#### **Sandboxing**

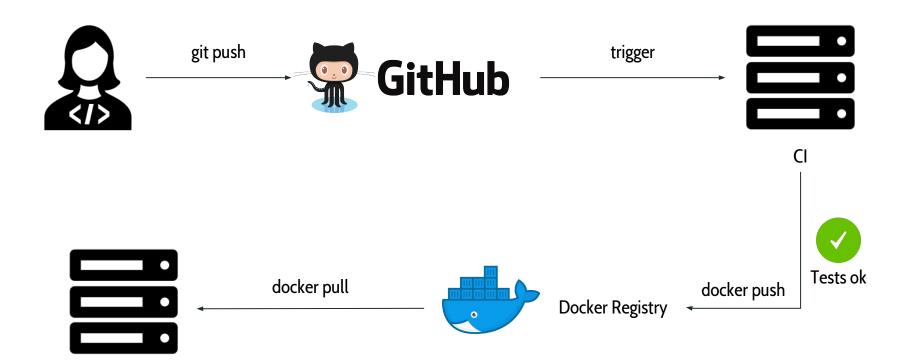

#### **Continuous(?) Integration**

#### **Continuous Integration**

**Production Server** 

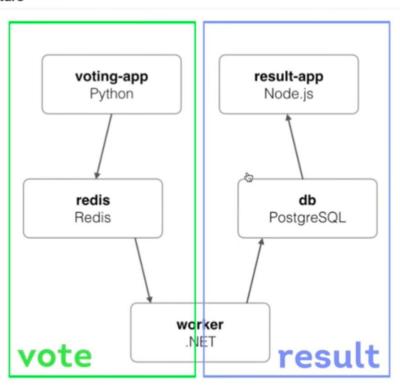

#### **Docker Compose: An Example**

```
votinglb:
  image: dockercloud/haproxy
  links:
    - voting
  ports:
    - '80:80'
voting:
  build: voting/
  links:
    - redis
results:
  build: results/
  links:
    - redis
  ports:
    - "8000:80"
redis:
  image: redis
```

#### **High Availability**

#### Architecture

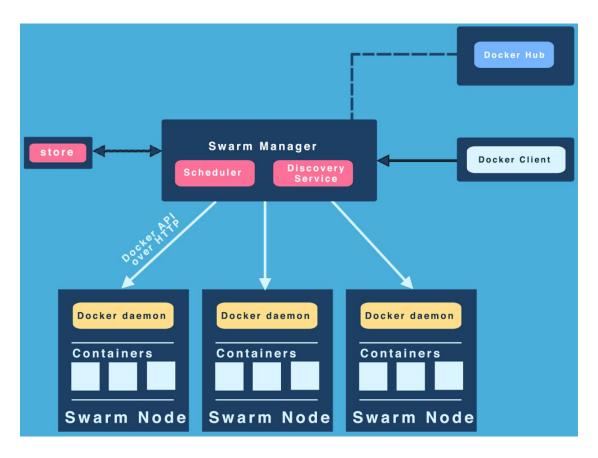

# Demo

CI & High Availability

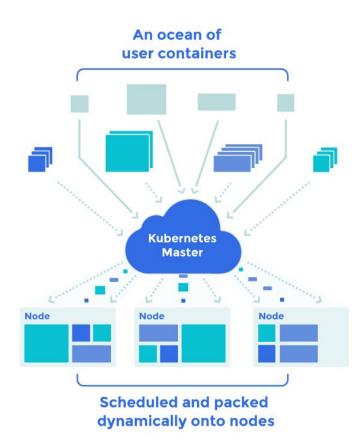

- docker-compose
- Github
- Docker Cloud

# **Distributed Docker**

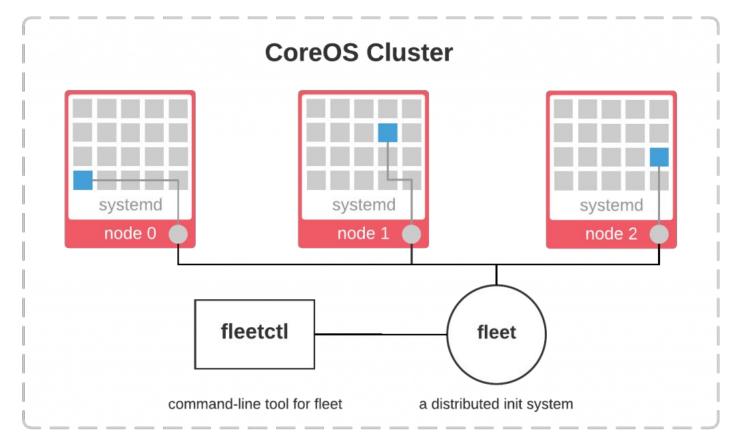

#### **Swarm Mode**

#### **Kubernetes**

#### **CoreOS**
